

# ClipItPack

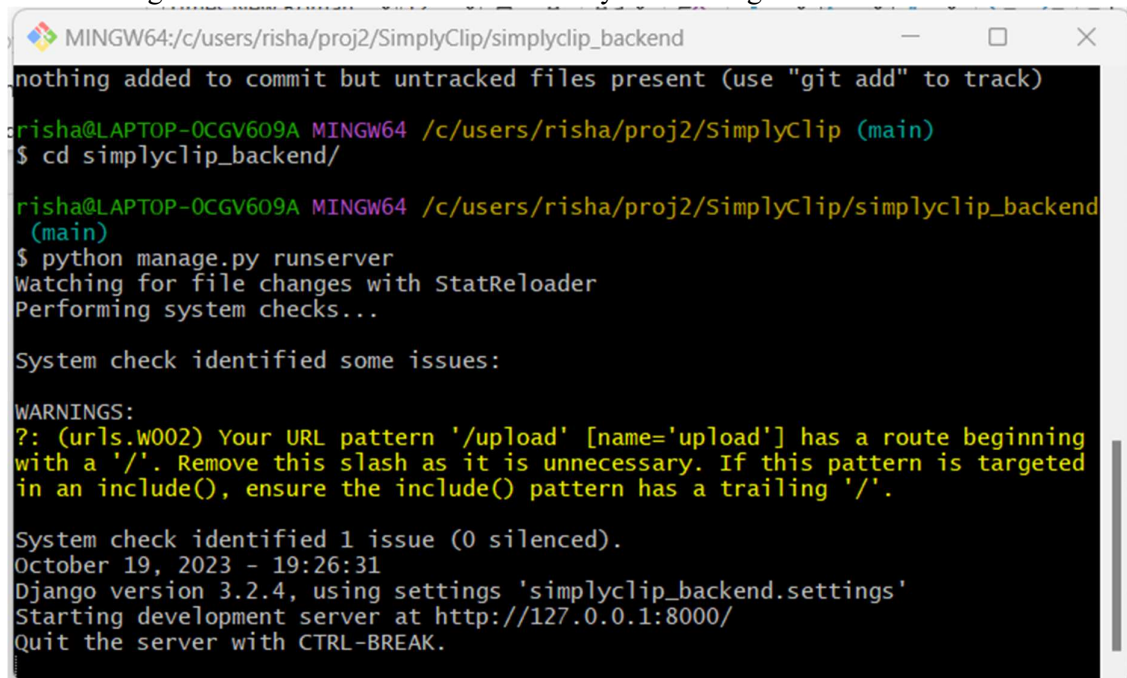

## (An extension of SimplyClip 4.0)

### Use-case Tutorial

#### Using the generate citation functionality

For these tutorials, we assume that you have successfully installed all the requirements and have been able to run the server.

1. The server must be up and running for this and once you have achieved that your terminal or git bash or whatever control terminal you are using should look like this:

```
MINGW64:/c/users/risha/proj2/SimplyClip/simplyclip_backend
nothing added to commit but untracked files present (use "git add" to track)
risha@LAPTOP-0CGV609A MINGW64 /c/users/risha/proj2/SimplyClip (main)
$ cd simplyclip_backend/

risha@LAPTOP-0CGV609A MINGW64 /c/users/risha/proj2/SimplyClip/simplyclip_backend
(main)
$ python manage.py runserver
Watching for file changes with StatReloader
Performing system checks...

System check identified some issues:

WARNINGS:
?: (urls.W002) Your URL pattern '/upload' [name='upload'] has a route beginning
with a '/'. Remove this slash as it is unnecessary. If this pattern is targeted
in an include(), ensure the include() pattern has a trailing '/'.

System check identified 1 issue (0 silenced).
October 19, 2023 - 19:26:31
Django version 3.2.4, using settings 'simplyclip_backend.settings'
Starting development server at http://127.0.0.1:8000/
Quit the server with CTRL-BREAK.
```

2. After this, we must have text copied in our extension.

3. Now, we can click on the citation button, which is the first button from the right side.
4. As we do that with a doi link in the copied text, we need to then click on the Doc download button. Citations are generated.
